BASF develops Cetiol SoftFeel soft-solid emollient and petrolatum alternative made from renewable ingredients

- **Based on 100% renewable ingredients, Cetiol SoftFeel enables eco-friendly and waterless formulations**
- **Alternative to cosmetic-grade petrolatum with similar sensorial properties and occlusivity**

FLORHAM PARK, NJ, February 16, 2022 – The natural, soft-solid emollient Cetiol® SoftFeel from BASF's Care Creations® offers an effective alternative to cosmetic-grade petrolatum based on renewable ingredients, rather than petroleum. Answering rapidly growing consumer demand for sustainable ingredients, Cetiol SoftFeel provides personal care brands with an eco-friendly alternative to traditional solutions.

Cetiol SoftFeel has a melting effect on the skin due to its transition from firm to liquid-like at skin temperature. It has been shown to leave skin softer and mimic petrolatum in occlusivity as well as sensorial profile. Thanks to its versatility, the emollient can be used to create face, body, hair, and baby care products with pleasant sensory properties.

“Cetiol SoftFeel exemplifies BASF's commitment to clean and natural ingredients that fit with market trends,” said Nader Mahmoud, Vice President Business Management for Personal Care North America. “As consumer needs and concerns evolve, we must

continue innovating alternative solutions which deliver both in performance and sustainability attributes.”

Cetiol SoftFeel is the most recent addition to the company’s Cetiol product family, a broad range of emollients for various personal care applications. With this launch, BASF is expanding its offering of innovative and eco-friendly solutions in the Care Creations existing portfolio of sustainable alternatives.

About the Care Chemicals division at BASF

The BASF division Care Chemicals offers a broad range of ingredients for personal care, home care, industrial & institutional cleaning, and technical applications. We are a leading global supplier for the cosmetics industry as well as the detergent and cleaner industry, and support our customers with innovative and sustainable products, solutions and concepts. The division’s high-performance product portfolio includes surfactants, emulsifiers, polymers, emollients, chelating agents, cosmetic active ingredients and UV filters. We have production and development sites in all regions and are expanding our presence in emerging markets. Further information is available online at www.care-chemicals.basf.com.
